

ECLIPSES AND ACTIVATION DATES FOR 2014

There were 27 active eclipses in 2014. The first half of the year was marked by activations by outer planets, with Jupiter activations from May through September. There were Pluto activations for the largest part of the year. The Dec 21 2010 eclipse was still activated and presaged an especially violent event in Iraq. In all, 2014 was a particularly violent year, especially in the first half of the year. Daesh and Boko Haram were especially in evidence in Iraq and Nigeria, respectively. The eclipses activated Saturn and Pluto in the first of the year are shown after the list of events.

The 4 Jan 11 eclipse (below), activated by Pluto at the start of the year, was an especially active and productive eclipse, showing many violent events. The eclipse point was at the midpoint of a stellium with Pluto and Mars, all three being in a wide conjunction, and with Mars and the eclipse point both being square to Saturn.
